Strava surprise drop

Hide a playlist, a route file, or a hype message at the trailhead. They unlock it only on arrival.

1. Drop at the start

Pin a GNote on the trail-head, the parking lot, the first turn. Inside: a Spotify link, a GPX file URL, a hype line — anything in 140 chars.

2. They arrive. It opens.

GPS-verified unlock. Your buddy actually has to show up at the trail-head for the playlist (or pep talk) to drop.

Perfect for

Race-morning boost

Drop a hype message at the start line. They open it ONLY when they get there — no spoilers.

Hidden route reveal

Treasure-hunt style: each GNote unlocks the GPS coords of the next one. Whole-city orienteering.

Trail-buddy invites

Pin an invite at a shared starting point. They show up → they're in. No long planning chat.
